

ARC SE Real World Comparison Report - QA Report

Automated QA checks requested filenames, page counts, required sections, company coverage, forbidden valuation-transfer phrases, Bulgarian language purity, source-map coverage, and page text density.

Check	Result
en_pages	25
bg_pages	25
source_pages	3
en_target_length	True
bg_target_length	True
en_sections_present	True
bg_sections_present	True
en_companies_present	True
bg_companies_present	True
source_companies_present	True
forbidden_phrases_absent	True
bg_no_latin_letters	True
en_text_density_min	1104
bg_text_density_min	1215
en_pages_under_1000_chars	[]
bg_pages_under_1000_chars	[]
visual_elements_present	True
automated_pass	True

QA interpretation

Automated QA pass: True. The English and Bulgarian editions are separate standalone PDFs, the source map is generated, and the report language avoids ARC SE valuation-transfer claims.

Render note

Raster page rendering is not available in this runtime because the existing Node canvas binding and Poppler/pdfinfo renderer are unavailable. Structural QA and extractable text-density QA were completed.
