| Hall Of Legends              | Session evidence framing and repeated organism evidence.                                              | Synthesis source; not modified.                 |
| Ecosystem Dossier            | Watcher, Coordinator, organism ecosystem, current internal inventory.                                 | Architecture source; not modified.              |
| Valuation Thesis             | Replacement difficulty, asset framing, source discipline.                                             | Context only; no valuation transfer.            |
| Strategic Acquisition Thesis | Buyer logic, acquisition hygiene, replacement difficulty.                                             | Context only; no acquisition conclusion.        |
| Investment Memorandum        | Executive framing and investor-readable categories.                                                   | Context only.                                   |
| Appendix A                   | Evidence register, organism/session evidence, confidence labels.                                      | Primary evidence register.                      |
| RapidQuant Ancestor Report   | Ancestor lineage, replay, paper/live boundaries, research runtime.                                    | Primary ancestor source.                        |
| Current Value Report         | Used only to position this report as market-evidence foundation, not to repeat the valuation verdict. | Not modified; not duplicated.                   |

Claim Trace

| Claim                                                | Source basis                                                                                                       | Boundary                                                         |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| Markets pay for observability.                       | Datadog, Dynatrace, Splunk, New Relic sources.                                                                     | Category evidence only.                                          |
| Markets pay for decision/process intelligence.       | Palantir, Celonis, C3 AI, Alteryx sources.                                                                         | No ARC SE equivalence.                                           |
| Markets pay for market knowledge systems.            | Bloomberg, FactSet, Morningstar, S&P Global sources.                                                               | Knowledge-system evidence only.                                  |
| Markets pay for AI evaluation and experiment memory. | Scale AI, Weights & Biases, Arize AI sources.                                                                      | No AI vendor equivalence.                                        |
| Markets pay for trading and research infrastructure. | NinjaTrader, TradeStation, QuantConnect, Trading Technologies, TradingView sources.                                | No brokerage equivalence.                                        |
| ARC SE overlaps with valuable categories.            | RapidQuant, May15, Appendix A, Operational Truth, replay, parity, Watcher, Coordinator, documentation, continuity. | Overlap is method/asset-level, not corporate valuation transfer. |

**Source discipline conclusion**

The report uses market evidence to prove category value. It does not assert ARC SE equals any comparable company and does not import comparable valuations into ARC SE.
