

Hardened Edition Changelog

The original Book #7 remains intact. This final hardening pass inserts an institutional-hardening section before the appendices and preserves the original chapters, source maps, evidence trace sections and guardrails.

The goal is not a rewrite. The goal is a definitive acquisition-thesis edition that can sit before the Master Presentation.

Added chapter	Purpose
Market Category Positioning	Adds dated real-company category map with source methodology and limitations.
Recreation Timeline Analysis	Conceptually separates layers that can be built from layers that must be lived.
Strategic Asset Inventory	Lists what actually exists across evidence, intelligence, governance, replay, archaeology, continuity, documentation, truth and organisms.
What Would Transfer In An Acquisition	Adds due-diligence transferability matrix with founder-context and validation needs.
Strategic Synergy Scenarios	Shows hypothetical usefulness without buyer claims.
Objection Stress Test	Adds hostile diligence objections and disciplined answers.
What This Book Does Not Prove	States customers, revenue, audited live performance and acquisition interest are not proven.
Final Institutional Test	Answers six final diligence questions explicitly.

EVIDENCE TRACE

Sources: Final hardening prompt. Category and acquisition language is hypothetical; no fixed valuation, investment recommendation or buyer claim is made.
