

APPENDIX A - THE EVIDENCE BOOK

Appendix A supports the canonical ARC SE Master Investor Dossier with organism-level evidence only. It does not rewrite the narrative or rank bots as the main proof.

APPENDIX A

Executive Evidence Summary

Appendix A proves the thesis with organism-level Peak Net, Final Net, and Retention Gap evidence.

ORGANISMS 7	SESSIONS SCANNED 200	HIGHEST PEAK NET \$7,347.35	HIGHEST FINAL NET \$7,251.78
LARGEST GAP \$323.38	BEST RETENTION 100.0%	CONFIDENCE High	

Generated from local ARC SE evidence files. No runtime trading logic touched.

A1. Executive Evidence Summary

Final Net alone is insufficient. Peak Net shows proven extraction capability; Final Net shows retained outcome; Retention Gap shows extracted value that was not retained. The gap is a research target, not a failure to hide.

The evidence supports the central ARC SE thesis: the system has repeatedly demonstrated high Peak Net extraction. The responsible research opportunity is reducing Peak-to-Final loss through memory accumulation, replay analysis, watcher intelligence, parity smoke tests, and small-capital live validation before scaling real capital.

Metric	Verified Value
Total organisms analyzed	7
Total sessions scanned	200
Highest Peak Net found	\$7,347.35
Highest Final Net found	\$7,251.78
Largest Retention Gap found	\$323.38
Best Retention % found	100.0%
Evidence confidence level	High

A2. Top 25 Organism Sessions By Peak Net

This is organism-level session ranking, not bot ranking. Rows are sorted by Peak Net descending.

A7. Monster Session Plates

Dedicated plates for the strongest sessions and evidence candidates found in the local corpus.

APPENDIX A MONSTER PLATE

May 15 overnight real-regime paper archive

Strongest verified extraction session found. The closed-trade curve reached the highest Peak Net in the scanned corpus, then finished lower, directly proving Peak Net versus Final Net.

ORGANISM 3004 Truth Organism	PEAK NET \$7,347.35	FINAL NET \$7,023.97	GAP \$323.38	RETENTION 95.6%
DURATION 18.49h	TRADES 19,492	SOURCE D:\5m-rapid-desktop\updates\OP\arcse-pre-quality-profitable-run-2026051...		

Why it matters

Strongest verified extraction session found. The closed-trade curve reached the highest Peak Net in the scanned corpus, then finished lower, directly proving Peak Net versus Final Net.

Generated from local ARC SE evidence files. No runtime trading logic touched.

3008 15m retained-net observation window

3008 Strike Force retained-net validation. This shows a high Peak retained-net state and a materially lower Final Net, making watcher memory and replay analysis a scaling prerequisite.

ORGANISM

Generated from local ARC SE evidence files. No runtime trading logic touched.

A8. Lost Extraction Book

These verified examples show why Final Net alone hides demonstrated extraction capability.

A session can finish positive while having reached a much higher Peak Net, and some sessions finish negative after showing positive extraction. The appendix therefore treats lost extraction as the research target: memory, replay, watcher analysis, parity smoke tests, and small-capital live validation should explain and reduce the gap before scaling.

A9. Charts Required

The following charts visualize Peak Net, Final Net, Retention Gap, retention percentage, timeline continuity, and confidence distribution.

Largest Retention Gap by Organism

Generated from local ARC SE evidence files. No runtime trading logic touched.

Top 25 Sessions by Peak Net

paper-2026-05-15T19-15-59-018Z__reset-2		\$7,347.35
optruth-20260515T192110-220		\$7,326.06
optruth-20260515T054455-021	\$1,932.72

Generated from local ARC SE evidence files. No runtime trading logic touched.

Retention % by Organism

Generated from local ARC SE evidence files. No runtime trading logic touched.

Peak Net vs Final Net Timeline

Line chart uses evidenced session timestamps where continuity is available.

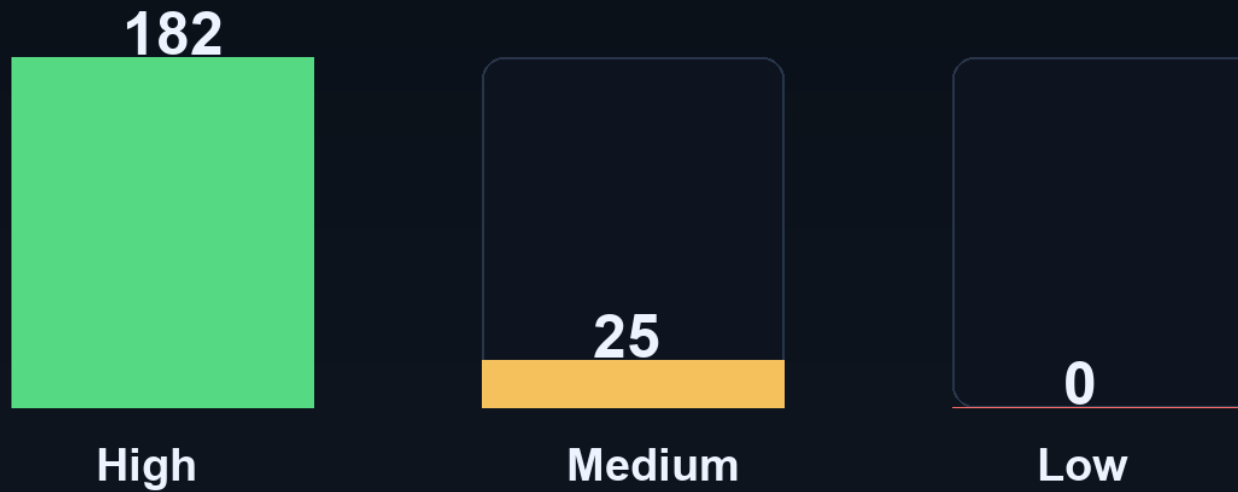

Peak Net
Final Net

Generated from local ARC SE evidence files. No runtime trading logic touched.

Evidence Confidence Distribution

High, Medium, and Low counts across numeric sessions and role evidence.

Generated from local ARC SE evidence files. No runtime trading logic touched.

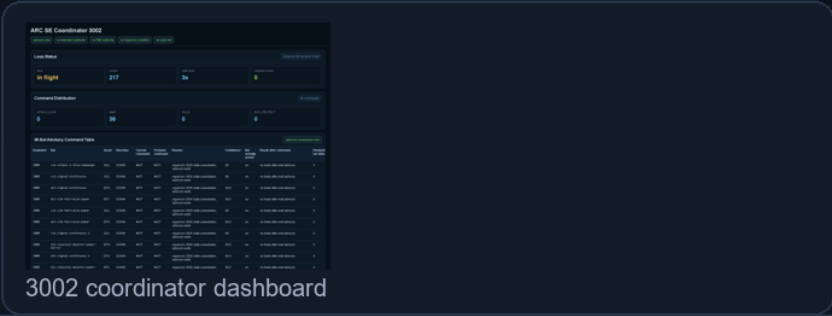

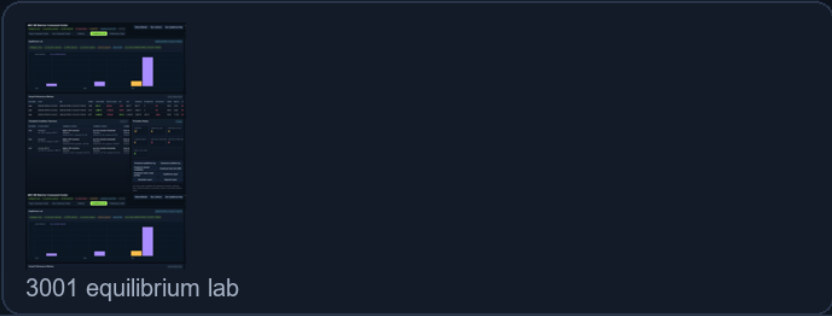

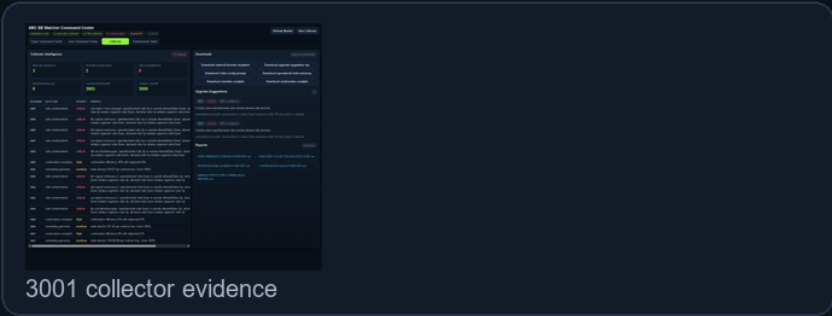

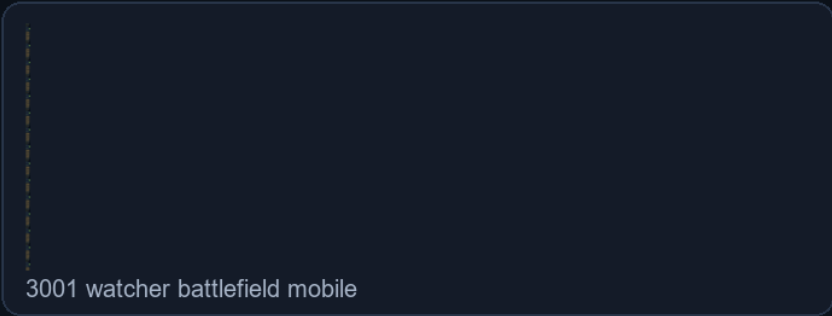

A10. Screenshot Evidence Plates

Real dashboard and watcher screenshots are included where available. Missing legendary screenshots are reported in A12.

APPENDIX A SCREENSHOT EVIDENCE

Screenshot Evidence Plates

Real ARC UI screenshots prioritized over generic dashboard views.

Generated from local ARC SE evidence files. No runtime trading logic touched.

Screenshot Evidence Plates

Real ARC UI screenshots prioritized over generic dashboard views.

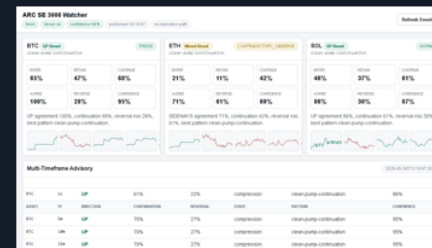

3008 max-net proof

3008 open PnL proof

3008 competitive benchmark

3006 watcher dashboard proof

Generated from local ARC SE evidence files. No runtime trading logic touched.

A11. Evidence Confidence Rules

Confidence labels are applied conservatively.

Confidence	Rule
High	Values directly extracted from operational truth/session archive/export with source path and date/session continuity.
Medium	Value found in validation report/dashboard export/package proof, but raw session archive is incomplete or not a PnL source.
Low	Only indirect/narrative mention or expected evidence missing; low-confidence values are not used as verified numeric proof.

A12. Missing Evidence Report

Missing evidence is reported explicitly rather than hidden behind placeholders.

Missing / Incomplete Evidence Item
May 8 Battlefield: historical session summaries found, but explicit Peak Net was not present; not used in Peak Net ranking without raw time-series derivation.
May 9 Benchmark: operational-truth time series found and ranked; prior canonical trade rows remain incomplete, so May 9 trade-ledger PnL rows are reported as missing.
May 9 Benchmark screenshot: no direct May 9 UI screenshot was verified in the screenshot corpus; source-backed time-series evidence is used instead.
May 15 Benchmark / Restoration: operational-truth and paper-session archive evidence found; replay-level cause attribution still requires deeper replay analysis.
May 15 / Restoration screenshot: no direct May 15 restoration UI screenshot was verified in the screenshot corpus.
3005 DOWN Predator monster evidence: isolated runtime/package evidence found, but no raw 3005 Peak Net / Final Net session archive was verified.
3005 DOWN Predator PnL screenshot: no 3005 monster PnL dashboard screenshot was verified.
3006 UP Predator: isolated package evidence found, but no raw 3006 Peak Net / Final Net session archive was verified.
3007 Micro Harvester: runtime/quarantine/micro-harvest evidence found, but no raw 3007 Peak Net / Final Net session archive was verified.
3001 Watcher and 3002 Coordinator: evidence is intelligence/command proof only; no trading PnL is fabricated for these layers.
Paper vs Live parity: parity archives were source-mapped, but parity PnL metrics were not promoted to verified organism Peak Net unless source rows exposed Peak and Final.
